

- 1 Steel deck
- 2 Primer
- 3 DEXCOAT 805 MB Screed
- 4 Heating cable (optional)
- 5 DEXCOAT 800 membrane and topcoat
OR
- 6 Glue for top finish
- 7 Tiles (other finishes are optional)
- 8 Sealing compound

DEXCOAT 805 MB Screed/underlayment

2 component high strength deck covering system for heavy load and traffic with excellent resistance against moisture.

DEXCOAT 805 MB is suitable for use in galley, shower, bathroom, scullery, cool store and outdoor deck. Also suitable for built-in heating cable wherever warm surface is required.

Technical specifications:

Thicknesses from 5 mm to 90 mm in one operation.
Specific gravity 1,6.

Certificates/tests:

SINTEF – Norwegian Fire Research Laboratory
IMO FTPC Part 2&6 (MSC 41 (64) & IMO Res. A 687 (16))
DNV –Det Norske Veritas Classification AS
Cert.no. MED-B-6060

DEXCOAT 800 Membrane/Top coat

2 component deck covering system based on synthetic resin.

DEXCOAT 800 is very suitable as deck covering material for weatherdeck and other places where good abrasion resistant is required. Dexcoat 800 is crack resistant and resistant against most common chemicals, acids and oil. Can also be applied with antiskid surface in traffic area.

Technical specifications

Thickness of 3mm must be laid in two turns.

Certificates/tests

SINTEF – Norwegian Fire Research Laboratory
IMO FTPC Part 2&6 (MSC 41 (64)
& IMO Res. A. 687 (16))
DNV-Det Norske Veritas Classification AS
Cert.no. MED-B-6062
Finnish Maritime Administration
